

Multi Room AV

Multi room A/V (audio, video) is one of the most common solutions we now provide. Being able to listen to music through out your home or in an individual location is now possible not only that but a different source (eg CD, Radio etc) may be listened to in any of these areas at an independent volume level.

Multi room A/V (audio, video) is one of the most common solutions we now provide. This allows our customers to listen or watch a DVD, Radio, Foxtel, Austar, and CD in any room of your home totally independent from any other room. Whether listening to CD at your BBQ area or listening to back ground music over the dinning table these systems allow quality sound through out your home all controlled through individual stylish touch pads.
